

Healthy on the road: cabin filter coolXpert SI plus

The new silver ion cabin filter

coolXpert SI plus ensures extended health protection of the vehicle occupants against allergens, particle pollution and bacteria.

The **coolXpert SI plus** covers all the characteristics of activated carbon filter; identical dust removal performance, dust storage capacity, absorption and no negative effect of the air pressure of the ventilation system.

With the new **coolXpert SI plus** cabin air filter, the structure, with several filter layers, ensures even cleaner air in the vehicle interior.

- The ultrafine fiber layer retains micro particles and particle pollution
- The activated carbon medium neutralizes odours and harmful gases
- The silver ion coating binds bacteria, germs and allergens
